Move

We finished our move to the new building! The last two weeks our assembly hall moved bit by bit with all the machines and equipment.

The office moved within almost one day (last Friday) completely to the new building. Every guy had to lend a hand. It was a lot of work but our management

supported us with free food and drink. Currently we are solving the last IT issues but are already enjoy working here.

Application Reports

ViscoTreat-H

The ViscoTreat-H is our special unit to avoid down times during barrel exchange. This unit has a filling capacity approx. 2 to 2.5L. With our special design of this system we can guarantee the material flow according to the first-in first-out principle.

The efficient amount to bridge the barrel exchange time is 150 or 300ml. If your application is consuming this or less amount, the ViscoTreat-H is the perfect solution to optimize the process and increase the profit due to less down times.

BondExpo

“945 exhibitors from 21 countries and 645,000 square feet of occupied overall exhibition floor space at MOTEK, plus 106 exhibitors from 9 countries and 41,000 square feet of occupied overall exhibition floor space at BONDExpo – all in all, 1051 manufacturers and suppliers were counted who filled up the available halls at the Stuttgart Exhibition Centre on 686,000 square feet” (<http://www.bondexpo-messe.com/en/bondexpo>)

The BondExpo 2011 was a very successful fair. Over 150 prospective customers from all over the world visited our booth.

Brick Gluing

As we already show with our Photovoltaic Flyer, we have three areas where our system are currently involved:

- Brick gluing
- Screen Printing
- Module framing/junction box potting

Here I want to present our cooperation with a big machine builder for whole brick gluing machines: “Herbert Arnold”.

Our ViscoDuo-V system is used here for applying the 2-component material to the brick. The brick is handled by a robot system to the stationary ViscoDuo-V (see picture).

But pictures (movies) explain more than 1000 words, so please write us an E-Mail and we will send you a link where you can download this movie. You are also allowed to show this movie to costumers. The only premise is that you do not change anything in the movie. The “Herbert Arnold” logo has be visible all the time.
